How to check for a VMTurbo software update
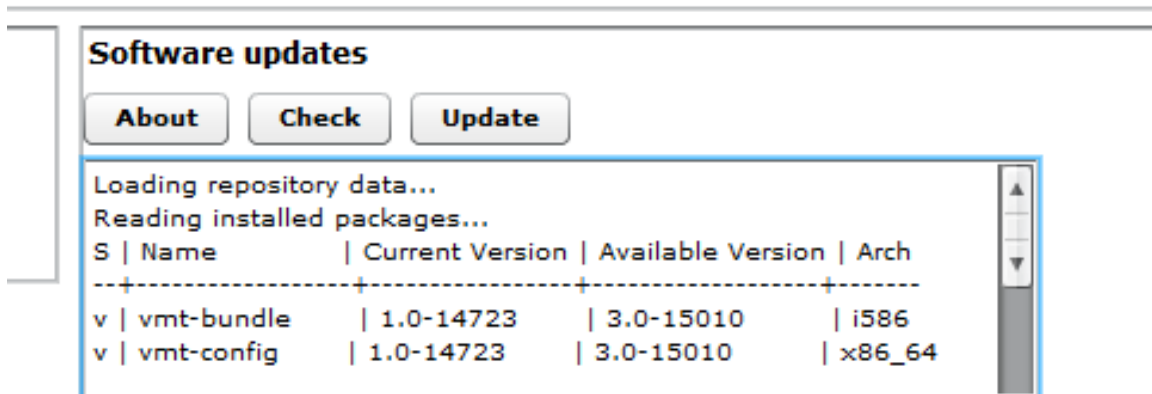

Login to the VMTurbo appliance
Navigate to the *Admin* Tab
Select the *Maintenance* Section of the Admin Tab
Scroll down to the bottom of the *Maintenance* section and locate *Software Updates*

1. Click the *Check* button
2. If there is an available update it will display similar to the above screenshot (*Note: If the VMTurbo software cannot access the Internet, *No Update Available* is displayed)
    a. If you get *No Update available* and you are not connected to the Internet, please check the Announcements to see if there is a new update and follow the Offline update procedure to bring you to the latest release.
3. If no update is available you will see *No Update Available* displayed
4. Click *Update* button and wait for the update process to complete. Don't refresh the browser during this time.
